Subject: RE: Regarding systematic review

Dear Kimberly,
From our end, the dates, in order of preference would be: 8th, 12th, 9th or 10th.
Thanks,
Tina

Subject: RE: Regarding systematic review

Dear Kimberly,

Thanks for getting back to us. Early January might work – we'll propose some possible date options. I think for now let's limit the agenda to the discussion of tools and methods IRIS is developing and using for pragmatic implementation of systematic review in our assessment practices. If by the time of the meeting we have new items of interest to share, we will be glad to incorporate them into the presentation. Sound good?

Thanks,

Tina

Subject: RE: Regarding systematic review

Dear Tina and Kris:

Thank you for your invitation to conduct a webinar meeting with ACC members and staff to review the IRIS program's activities on systematic review. We would welcome the opportunity to hear from you on this area. We would propose that the webinar meeting be scheduled for 1.5 hours (i.e. 1 hour for EPA presentation and 30 minutes for discussion). Given upcoming travel, scientific meetings and holiday schedules, we would propose having the webinar meeting sometime during the 2nd or 3rd week of January 2018. Let me know if there is a date in this timeframe that would work for your schedule.

In planning for the webinar, we would like to suggest a few areas that would be of interest to ACC staff and members for EPA to cover in the webinar. These are: (1) implementation of systematic review tools, specifically related to evidence integration of various data streams and incorporation of mode of action; (2) additional details on the components of the protocol document; (3) path forward for the IRIS Handbook, including proposed content and dates/plans for public release and comment; and (4) update on the IRIS assessment priorities setting process as it appears this has been recently revised, but details on the revision have not been communicated to stakeholders.

I look forward to hearing from you regarding availability in January 2018.

Kind Regards,

Kimberly Wise White, Ph.D. | American Chemistry Council

I'm in DC a fair amount in November, in particular the week of November 13th looks good. I'm also in DC during the first 2 weeks in December. I'd be happy to stop by ACC. Alternatively, we can do remote if those weeks don't work or if you think there won't be enough interested people onsite at ACC to make the visit worthwhile. -k

Rick,
Kris might be on a flight heading back from London, but we have done these in person and by webinar, and in general they work well both ways. She could also come to ACC to be 'present' with whomever happens to be there and webinar out to members? I think this should be doable. I thought there might be benefit to coordinating among LRI and CPTD – but if it becomes too complicated, we can do more than one.

Tina

Subject: RE: Regarding systematic review

Hi Tina – thanks for the suggestion. Our next LRI SST meeting will be a conference call in December. So we probably don't want to wait that long to schedule such an update. Were you thinking a webinar or in person presentation at ACC (that we can also do as a webinar for members)? Kimberly and I can confer after I get back to ACC after the ISES meeting and come up with a couple of potential dates/times to suggest to you and Kris.

Thanks

Rick

Subject: Regarding systematic review

Good morning Rick and Kimberly,

Following on recent discussions at the NAS BEST and the formaldehyde meeting last week, there seems to be some interest in tools and methods IRIS is developing and using for pragmatic implementation of systematic review in our assessment practices. If you are planning meetings with your members in LRI and/or CPTD, and think there might be interest, it might be good for Kris to provide an update on these efforts? What do you think?

Thanks,

Tina
